## 22. [SCRUM-TC-23 \(1\)](#): Mismatching New and Confirm Password

Description	Verify that the password change fails if the new password and confirm password do not match.
Pre-Condition	User is logged into the system.

### Steps

#	Step	Data	Expected Result
1.	1. Log into the application. 2. Navigate to the <b>Change Password</b> page. 3. Enter the <b>correct current password</b> . 4. Enter a <b>valid new password</b> . 5. Enter a <b>different password</b> in the "Confirm Password" field. 6. Submit the form.	<123456 > <123456 78> <123456 7>	The system displays an error message (e.g., "New password and confirm password do not match"), and the password is not changed.

313. <a href="#">SCRUM-TC-314 (1)</a> : Verify Sorting of Syllabus List by Date			
Description			
Pre-Condition		1. User is logged in as admin or student.  2. Syllabus files with different upload dates are available.	
Steps			
#	Step	Data	Expected Result
1.	Click on the "Date" column header in the syllabus list.		The syllabus list should be sorted by date in ascending or descending order.
2.	Click the column header again to reverse the sorting order.		The sort order should toggle between ascending and descending.

316. <a href="#">SCRUM-TC-317 (1)</a> : Verify Syllabus List Data Consistency			
Description			
Pre-Condition		1. User is logged in as admin or student.  2. Syllabus files are uploaded with various details like class, section, and title.	
Steps			
#	Step	Data	Expected Result
1.	Verify the data displayed in each column (Class /Section, Available For, Date, Type, Content Title).		All data should be displayed correctly and match the syllabus's metadata (class, section, title, etc.).
2.	Cross-check the syllabus titles and types against the uploaded files.		Each title should match the uploaded syllabus content, and the type (e.g., Syllabus) should correspond accurately.
